◆◆◆◆◆  
Excellent

◆ Databases: Sqlite, Mongo DB

◆◆◆◆◆  
Excellent

### Work History

◆ Jun 2021 - **Associate Software Engineer**  
Current Valuebound, Bangalore, Karnataka

#### Project :

#### Classplus:

In this project we had developed a dashboard for Store Team, It is for tracking the data for which the users joined for a course through the influencers, the influencers are like youtube stars, instagram and we can store that influencers data through forms and track the status like pending, in progress, etc and admins can view all the influencers and assign some personal candidates to that influencers for support.

#### HMS-Mobile App

It's a job portal which can users can search and apply for jobs and organizations can post jobs and recruit the candidates, It can be helpful for both the ones who are searching for jobs and the organizations to post jobs and shortlist candidates  
Technologies used: ReactNative, Redux, CSS In Front End and In Backend  
Nodejs, ExpressJs and in MongoDB for Database
